WideTEK® 21 Inch Color Touchscreen Monitor

The WT-TOUCH21 is a large color touchscreen for direct operation of a scanner without external PC. The touchscreen is mounted directly to the back of the scanner and therefore ensures the smallest possible footprint.

The monitor features 16:9 full HD (1920 x 1080) resolution and a 3,000:1 high contrast ratio. Combined with a wide (178°/178°) viewing angle it is ideally suited for effective post-scan image previewing.

Operate the scanner, zoom in and preview your scanned images for quality assurance and highest productivity.

Use touchscreen enhanced versions of ScanWizard, PrintWizard and EasyScan with Scan2Net firmware.

Features

- High definition resolution of scanned images in 1920 x 1080 pixels.
- Use with WideTEK 36/48/60 CIS scanners.
- Stylish edge to edge glass.
- Multitouch capabilities.
- Simplified manipulation of scans in job mode.
- Predefined and configurable scanner and user templates.
- Power consumption of only 20VA (typical), ENERGYSTAR. compliant

21 Inch preview monitor mounted to the side of a WideTEK scanner
